Claims 1-10 are presented for examination

The amendment filed November 22, 2003 cancelled claims 11-23, rendering the rejection of such claims moot.

Examiner finds the argument with regard to claiming of measurement of HCMV gamma M and gamma G levels by measuring nonstructural epitopes convincing. This limitation is not presented in the invention claimed in the parent applications. The instant claimed invention fails to dominate the parent invention and, thus, would not be subject to an obviousness double patenting rejection. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Russell Travers, J.D., Ph.D whose telephone number is 703-308-4603. The examiner can normally be reached on Monday through Thursday from 7:00 to 4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sreenivasan Padmanabhan, can be reached on 571-272-0629. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
